Bug Report

Defect ID	Bug Description	Steps to Reproduce	Priority	Severity	Status	Created By	Assigned To
1	On the bus search page, selecting the same city in both "From" and "To" fields is allowed, instead of showing a validation error.	1. Launch https://www.redbus.in . 2. In the "From" field, enter and select a city (e.g. Bangalore). 3. In the "To" field, enter and select the SAME city (Bangalore). 4. Select any travel date. 5. Click "Search Buses". 6. Observe the search results / error handling. 7. Note that the system does not block or warn about identical source and destination cities.	Medium	Major	New	Manish Yadav	Raghvendra BN
2	On the seat selection page, deselecting a previously selected seat does not immediately update the total fare shown in the fare summary.	1. Launch https://www.redbus.in and search for buses on any valid route/date. 2. Open any bus and select 2 seats on the seat map. 3. Note the total fare shown in the summary panel. 4. Click on one of the selected seats again to deselect it. 5. Observe the total fare in the summary panel. 6. Note that the fare does not immediately refresh to reflect only 1 seat. 3	The passenger Mobile Number field on the traveller-details page accepts fewer than 10 digits and still allows the user to proceed to payment.	1. Launch https://www.redbus.in and proceed to the traveller details page for any bus/seat. 2. Fill in passenger Name and Age. 3. In the Mobile Number field, enter fewer than 10 digits (e.g. "98765"). 4. Fill in a valid Email ID. 5. Click "Proceed to Pay". 6. Note that the form does not block submission or show a clear inline error for the incomplete mobile number.	High	Major	New	Manish Yadav	Raghvendra BN
4	Applying the "AC" bus-type filter on the search results page does not remove non-AC buses from the displayed list.	1. Launch https://www.redbus.in . 2. Search for buses on a route with a mix of AC and Non-AC operators (e.g. Bangalore to Chennai). 3. In the filters panel, enable the "AC" checkbox. 4. Observe the filtered list of buses. 5. Check the bus-type label shown on each result card. 6. Note that one or more Non-AC buses still appear in the filtered results.	Medium	Major	New	Manish Yadav	Raghvendra BN
5	Entering an invalid or expired coupon code at checkout does not display an "invalid coupon" message; the field simply clears with no fare change.	1. Launch https://www.redbus.in and proceed to the payment/checkout page after selecting seats and entering traveller details. 2. Locate the "Apply Coupon" field. 3. Enter a random/invalid coupon code (e.g. "TEST9999"). 4. Click "Apply". 5. Observe the coupon field and the fare total. 6. Note that no clear "Invalid coupon code" error message is shown to the user.
